NOTE: EVERGREEN TREES can be planted successfully most anytime the ground is not frozen too hard to dig. We, however, start our Fall Season Shipping about September first and continue until the ground is frozen too hard to dig. The Spring Shipping starts early in Spring and continues until July first. Our checking of root and top growth and losses during these seasons insure best results.

The materials appearing in this list are in stock now in the sizes listed. We also have larger sizes in some of the items but we prefer to have you come to the Nursery and select these as it is expensive to ship larger plants at this time. Also, the war materials need transportation. So we are offering the small sizes — it is interesting to watch them grow—and once started they require very little care. Consult your County Agent or Agriculture Dept. of your nearest College or State regarding soil and planting conditions in your community.

We are always ready to help you find the right plant for the right location. Write us. Our suggestions might meet your requirements.

Plant early! Get your order to us soon and we will ship promptly.
